

SAINT JOHN'S

Supporting Pupils with Medical Conditions

Designated Member of Staff	Head Teacher
Committee with responsibility	Resources
Date of Issue	Autumn 2021
Frequency of Review	Annual

Issue Number	Issue Date	Summary of Changes
1	December 2021	https://www.gov.uk/government/publications/supporting-pupils-at-school-with-medical-conditions--3
2	July 2022	Reviewed and ratified at T6 FGB meeting
3	November 2022	Reference to supporting pupils with health conditions who cannot attend school
4	February 2023	Reviewed and ratified by governors in T3 FGB
5	January 2024	A few sentence changes - ratified by governors in T3 FGB
6	January 2025	Complete overhaul of the policy – ratified in T3 FGB
7	April 2026	Reviewed and ratified by governors in FGB 8

Introduction and background

This policy is written to underpin our school ethos to ensure that we all flourish at Saint John's C.E. Primary School. Saint John's aims to support all children with medical conditions. There is a separate Policy for 'supporting children with health conditions who cannot attend school' which focuses on those with health conditions who are not in school, whereas this policy focuses on those with medical needs who attend school.

- Individual Healthcare Plan Form

Statement of intent

The governing board of Saint John's CE Primary School has a duty to ensure arrangements are in place to support pupils with medical conditions. The aim of this policy is to ensure that all pupils with medical conditions, in terms of both physical and mental health, receive appropriate support to allow them to play a full and active role in school life, remain healthy, have full access to education (including school trips and PE), and achieve their academic potential.

The school believes it is important that parents of pupils with medical conditions feel confident that the school provides effective support for their children's medical conditions, and that pupils feel safe in the school environment.

Some pupils with medical conditions may be classed as disabled under the definition set out in the Equality Act 2010. The school has a duty to comply with the Act in all such cases. In addition, some pupils with medical conditions may also have SEND and have an Education, Health and Care (EHC) plan collating their health, social and SEND provision. For these pupils, the school's compliance with the DfE's 'Special educational needs and disability code of practice: 0 to 25 years' and the school's Special Educational Needs and Disabilities (SEND) Policy will ensure compliance with legal duties.

To ensure that the needs of our pupils with medical conditions are fully understood and effectively supported, we consult with health and social care professionals, pupils and their parents.

Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- Education Act 2002
- Education Act 1996 (as amended)
- Children Act 1989
- National Health Service Act 2006 (as amended)
- Equality Act 2010
- Health and Safety at Work etc. Act 1974
- Misuse of Drugs Act 1971
- Medicines Act 1968
- The School Premises (England) Regulations 2012 (as amended)
- The Special Educational Needs and Disability Regulations 2014 (as amended)
- The Human Medicines (Amendment) Regulations 2017
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law)
- DfE 'Special educational needs and disability code of practice: 0-25 years'
- DfE 'School Admissions Code'
- DfE 'Supporting pupils at school with medical conditions'
- DfE 'First aid in schools, early years and further education'
- Department of Health 'Guidance on the use of adrenaline auto-injectors in schools'

This policy operates in conjunction with the following school policies:

- Administering Medication Policy
- Special Educational Needs and Disabilities (SEND) Policy

- Pupil Drug and Alcohol Policy
- Asthma Policy
- Allergen and Anaphylaxis Policy
- Complaints Procedures Policy
- Pupil Equality, Equity, Diversity and Inclusion Policy
- Attendance and Absence Policy
- Pupils with Additional Health Needs Attendance Policy
- Admissions Policy

Roles and responsibilities

The governing board will be responsible for:

- Reviewing this policy alongside the headteacher and school nurse.
- Ensuring that this policy is readily accessible to parents and school staff.
- Ensuring that arrangements are in place to support pupils with medical conditions.
- Ensuring that pupils with medical conditions can access and enjoy the same opportunities as any other pupil at the school.
- Working with the local authority (LA), health professionals, commissioners and support services to ensure that pupils with medical conditions receive a full education.
- Ensuring that, following long-term or frequent absence, pupils with medical conditions are reintegrated effectively.
- Ensuring that the focus is on the needs of each pupil and what support is required to support their individual needs.
- Instilling confidence in parents and pupils in the school's ability to provide effective support.
- Ensuring that all members of staff are properly trained to provide the necessary support and are able to access information and other teaching support materials as needed.
- Ensuring that no prospective pupils are denied admission to the school because arrangements for their medical conditions have not been made.
- Ensuring that pupils' health is not put at unnecessary risk. As a result, governors hold the right to not accept a pupil into school at times where it would be detrimental to the health of that pupil or others to do so, such as when the child has an infectious disease.
- Ensuring that policies, plans, procedures and systems are properly and effectively implemented, including an Individual Healthcare Plan (IHP) where relevant.
- Ensuring that the school's policy clearly identifies the roles and responsibilities of all those involved in the arrangements they make to support pupils and sets out the procedures to be followed whenever a school is notified that a pupil has a medical condition.

The headteacher will be responsible for:

- Reviewing this policy alongside the governing board and school nurse.
- The overall implementation of this policy.
- Ensuring that this policy is effectively implemented with stakeholders.
- Ensuring that all staff are aware of this policy and understand their role in its implementation.
- Ensuring that all staff who need to know are aware of the child's condition.

- Ensuring that a sufficient number of staff are trained and available to implement this policy and deliver against all individual healthcare plans (IHPs), including in emergency situations.
- Considering recruitment needs for the specific purpose of ensuring pupils with medical conditions are properly supported.
- Having overall responsibility for the development of IHPs, alongside other school leaders
- Ensuring that staff are appropriately insured and aware of the insurance arrangements.
- Contacting the school nurse where a pupil with a medical condition requires support that has not yet been identified.

Parents will be responsible for:

- Notifying the school if their child has a medical condition.
- Providing the school with sufficient and up-to-date information about their child's medical needs.
- Being involved in the development and review of their child's IHP.
- Carrying out any agreed actions contained in the IHP.
- Ensuring that they, or another nominated adult, are contactable at all times.

Pupils will be responsible for:

- Being fully involved in discussions about their medical support needs, where applicable.
- Contributing to the development of their IHP, if they have one, where applicable.
- Being sensitive to the needs of pupils with medical conditions.

School staff will be responsible for:

- Providing support to pupils with medical conditions, where requested, including the administering of medicines, but are not required to do so.
- Taking into account the needs of pupils with medical conditions in their lessons when deciding whether or not to volunteer to administer medication.
- Receiving sufficient training and achieve the required level of competency before taking responsibility for supporting pupils with medical conditions.
- Knowing what to do and responding accordingly when they become aware that a pupil with a medical condition needs help.

The school nurse will be responsible for:

- Reviewing this policy alongside the governing board and headteacher.
- Notifying the school at the earliest opportunity when a pupil has been identified as having a medical condition which requires support in school.
- Supporting staff to implement IHPs and providing advice and training.
- Liaising with lead clinicians locally on appropriate support for pupils with medical conditions.

Clinical commissioning groups (CCGs) will be responsible for:

- Ensuring that commissioning is responsive to pupils' needs, and that health services are able to cooperate with schools supporting pupils with medical conditions.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.

- Being responsive to LAs and schools looking to improve links between health services and schools.
- Providing clinical support for pupils who have long-term conditions and disabilities.
- Ensuring that commissioning arrangements provide the necessary ongoing support essential to ensuring the safety of vulnerable pupils.

Other healthcare professionals, including GPs and paediatricians, are responsible for:

- Notifying the school nurse when a child has been identified as having a medical condition that will require support at school.
- Providing advice on developing IHPs.
- Providing support in the school for children with particular conditions, e.g. asthma, diabetes and epilepsy, where required.

Providers of health services are responsible for cooperating with the school, including ensuring communication takes place, liaising with the school nurse and other healthcare professionals, and participating in local outreach training.

The LA will be responsible for:

- Commissioning school nurses for local schools.
- Promoting cooperation between relevant partners.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Providing support, advice, guidance, and suitable training for school staff, ensuring that IHPs can be effectively delivered.
- Working with the school to ensure that pupils with medical conditions can attend school full-time.

Where a pupil is away from school for 15 days or more (whether consecutively or across a school year), the LA has a duty to make alternative arrangements, as the pupil is unlikely to receive a suitable education in a mainstream school.

Admissions

Admissions will be managed in line with the school's Admissions Policy.

No child will be denied admission to the school or prevented from taking up a school place because arrangements for their medical condition have not been made; a child may only be refused admission if it would be detrimental to the health of the child to admit them into the school setting.

The school will not ask, or use any supplementary forms that ask, for details about a child's medical condition during the admission process.

Notification procedure

When the school is notified that a pupil has a medical condition that requires support in school, the school nurse will inform the headteacher. Following this, the school will arrange a meeting with parents, healthcare professionals and the pupil, with a view to discussing the necessity of an IHP, outlined in detail in the [IHPs](#) section of this policy.

The school will not wait for a formal diagnosis before providing support to pupils. Where a pupil's medical condition is unclear, or where there is a difference of opinion concerning what support is required, a judgement will be made by the headteacher based on all available evidence, including medical evidence and consultation with parents.

For a pupil starting at the school in a September uptake, arrangements will be put in place prior to their introduction and informed by their previous institution. Where a pupil joins the school mid-term or a new diagnosis is received, arrangements will be put in place within two weeks.

Staff training and support

Any staff member providing support to a pupil with medical conditions will receive suitable training, including supply staff where relevant. Staff will not undertake healthcare procedures or administer medication without appropriate training. Training needs will be assessed by the school nurse through the development and review of IHPs, on an annual basis for relevant school staff and when a new staff member arrives. The school nurse will confirm the proficiency of staff in performing medical procedures or providing medication. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed..

Through training, staff will have the requisite competency and confidence to support pupils with medical conditions and fulfil the requirements set out in IHPs. Staff will understand the medical conditions they are asked to support, their implications, and any preventative measures that must be taken.

The school nurse will identify suitable training opportunities that ensure all medical conditions affecting pupils in the school are fully understood, and that staff can recognise difficulties and act quickly in emergency situations.

Training will be commissioned by the SBM and provided by the relevant bodies, such as:

- Commercial training provider
- The school nurse
- The parents of pupils with medical conditions

The parents of pupils with medical conditions will be consulted for specific advice and their views are sought where necessary, but they will not be used as a sole trainer.

Self-management

Following discussion with parents, pupils who are competent to manage their own health needs and medicines will be encouraged to take responsibility for self-managing their medicines and procedures. This will be reflected in their IHP. Where possible, pupils will be allowed to carry their own medicines and relevant devices. Where it is not possible for pupils to carry their own medicines or devices, they will be held in suitable locations that can be accessed quickly and easily. If a pupil refuses to take medicine or carry out a necessary procedure, staff will not force them to do so. Instead, the procedure agreed in the pupil's IHP will be followed. Following such an event, parents will be informed so that alternative options can be considered.

If a pupil with a controlled drug passes it to another child for use, this is an offence and appropriate disciplinary action will be taken.

Individual healthcare plans (IHPs)

The school, healthcare professionals and parents agree, based on evidence, whether an IHP will be required for a pupil, or whether it would be inappropriate or disproportionate to their level of need. If no consensus can be reached, the headteacher will make the final decision. The school, parents and a relevant healthcare professional will work in partnership to create and review IHPs. Where appropriate, the pupil will also be involved in the process.

IHPs will include the following information:

- The medical condition, along with its triggers, symptoms, signs and treatments
- The pupil's needs, including medication (dosages, side effects and storage), other treatments, facilities, equipment, access to food and drink (where this is used to manage a condition), dietary requirements, and environmental issues
- The support needed for the pupil's educational, social and emotional needs
- The level of support needed, including in emergencies
- Whether a child can self-manage their medication
- Who will provide the necessary support, including details of the expectations of the role and the training needs required, as well as who will confirm the supporting staff member's proficiency to carry out the role effectively
- Cover arrangements for when the named supporting staff member is unavailable
- Who needs to be made aware of the pupil's condition and the support required
- Arrangements for obtaining written permission from parents and the headteacher for medicine to be administered by school staff or self-administered by the pupil
- Separate arrangements or procedures required during school trips and activities
- Where confidentiality issues are raised by the parents or pupil, the designated individual to be entrusted with information about the pupil's medical condition
- What to do in an emergency, including contact details and contingency arrangements

Where a pupil has an emergency healthcare plan prepared by their lead clinician, this will be used to inform the IHP. The IHP will be developed with the child's best interests in mind. In preparing the IHP the school will assess and manage risks to the child's education, health and social wellbeing, and minimise disruption. IHPs will be easily accessible to those who need to refer to them, but confidentiality will be preserved.

Where a pupil has an EHC plan, the IHP will be linked to it or become part of it. Where a child has SEND but does not have a statement or EHC plan, their SEND will be mentioned in their IHP.

Where a child is returning from a period of hospital education, alternative provision or home tuition, the school will work with the LA and education provider to ensure that their IHP identifies the support the child will need to reintegrate.

All IHPs will be reviewed at least annually, or earlier if evidence is presented that the child's needs have changed.

Managing medicines

In accordance with the school's Administering Medication Policy, medicines will only be administered at school when it would be detrimental to a pupil's health or school attendance not to do so. Pupils under 16 years old will not be given prescription or non-prescription medicines without their parents' written consent, except where the medicine has been prescribed to the pupil without the parents' knowledge. In such cases, the school will encourage the pupil to involve their parents, while respecting their right to confidentiality.

Non-prescription medicines may be administered in the following situations:

- When it would be detrimental to the pupil's health not to do so
- When instructed by a medical professional

No pupil under the age of 16 will be given medicine containing aspirin unless prescribed by a doctor. Pain relief medicines will not be administered without first checking when the previous dose was taken, and the maximum dosage allowed.

Parents will be informed any time medication is administered that is not agreed in an IHP.

The school will only accept medicines that are in-date, labelled, in their original container, and contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container.

All medicines will be stored safely. Pupils will be informed where their medicines are at all times and will be able to access them immediately, whether in school or attending a school trip or residential visit. Where relevant, pupils will be informed of who holds the key to the relevant storage facility. When medicines are no longer required, they will be returned to parents for safe disposal. When no longer required, medicines will be returned to the parent to arrange for safe disposal. Sharps boxes will be used for the disposal of needles and other sharps. Controlled drugs will be stored in a non-portable container and only named staff members will have access; however, these drugs can be easily accessed in an emergency. A record will be kept of the amount of controlled drugs held and any doses administered. Staff may administer a controlled drug to a pupil for whom it has been prescribed, in accordance with the prescriber's instructions.

The school will hold asthma inhalers for emergency use. The inhalers will be stored in the medical room and their use will be recorded. Inhalers will be used in line with the school's Asthma Policy.

Records will be kept of all medicines administered to individual pupils, stating what, how and how much medicine was administered, when, and by whom. A record of side effects presented will also be held.

Non-prescription medicines

The school is aware that pupils may, at some point, suffer from minor illnesses and ailments of a short-term nature, and that in these circumstances, health professionals are likely to advise parents to purchase over the counter medicines, for example, paracetamol and antihistamines. The school works on the premise that parents have the prime responsibility for their child's health and should provide schools and settings with detailed information about their child's medical condition as and when any illness or ailment arises.

To support full attendance the school will consider making arrangements to facilitate the administration of non-prescription medicines following parental request and consent.

Pupils and parents will not be expected to obtain a prescription for over-the-counter medicines as this could impact on their attendance and adversely affect the availability of appointments with local health

services due to the imposition of non-urgent appointments being made. If a pupil is deemed too unwell to be in school, they will be advised to stay at home or parents will be contacted and asked to take them home. When making arrangements for the administration of non-prescription medicines, the school will exercise the same level of care and caution, following the same processes, protocols and procedures as those in place for the administration of prescription medicines.

The school will also ensure that the following requirements are met when agreeing to administer non-prescription medicines.

- Non-prescription medicines will not be administered for longer than is recommended. For example, most pain relief medicines, such as ibuprofen and paracetamol, will be recommended for three days use before medical advice should be sought. Aspirin will not be administered unless prescribed.
- Parents will be asked to bring the medicine in, to enable the appropriate paperwork to be signed by the parent and for a check to be made of the medication details.
- Non-prescription medicines must be supplied in their original container, have instructions for administration, dosage and storage, and be in date. The name of the child can be written on the container by an adult if this helps with identification.
- Only authorised staff who are sufficiently trained will be able to administer non-prescription medicines.

Paracetamol

The school is aware that paracetamol is a common painkiller that is often used by adults and children to treat headaches, stomach ache, earache, cold symptoms, and to bring down a high temperature; however, it also understands that it can be dangerous if appropriate guidelines are not followed and recommended dosages are exceeded.

The school is aware that paracetamol for children is available as a syrup from the age of 2 months; and tablets (including soluble tablets) from the age of 6 years, both of which come in a range of strengths. The school understands that children need to take a lower dose than adults, depending on their age and sometimes, weight. The school will ensure that authorised staff are fully trained and aware of the [NHS advice](#) on how and when to give paracetamol to children, as well as the recommended dosages and strength. Staff will always check instructions carefully every time they administer any medicine, whether prescribed or not, including paracetamol. The school will ensure that they have sufficient members of staff who are appropriately trained to manage medicines and health needs as part of their duties. The written consent of parents will be required in order to administer paracetamol to pupils.

Allergens, anaphylaxis and adrenaline auto-injectors (AAIs)

Parents are required to provide the school with up-to-date information relating to their children's allergies, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

The headteacher and catering team will ensure that all pre-packed foods for direct sale (PPDS) made on the school site meet the requirements of Natasha's Law, i.e. the product displays the name of the food and a full, up-to-date ingredients list with allergens emphasised, e.g. in bold, italics or a different colour.

The catering team will also work with any external catering providers to ensure all requirements are met and that PPDS is labelled in line with Natasha's Law. Further information relating to how the school operates in line with Natasha's Law can be found in the Whole-School Food Policy.

Staff members receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies. Where a pupil has been prescribed an AAI, this will be written into their IHP. A Register of Adrenaline Auto-Injectors (AAIs) will be kept of all the pupils who have been prescribed an AAI to use in the event of anaphylaxis. Pupils who have prescribed AAI devices, and are aged seven or older, can keep their device in their possession. For pupils under the age of seven who have prescribed AAI devices, these will be stored in a suitably safe and central location: the medical cabinet, accessed in the staff toilet (which is coded). Designated staff members will be trained on how to administer an AAI, and the sequence of events to follow when doing so. AAIs will only be administered by these staff members.

In the event of anaphylaxis, a designated staff member will be contacted. Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI. If necessary, other staff members may assist the designated staff members with administering AAIs, e.g. if the pupil needs restraining.

The school will keep a spare AAI for use in the event of an emergency, which will be checked each term to ensure that it remains in date, and which will be replaced before the expiry date. The spare AAI will be stored in the medical cabinet, ensuring that it is protected from direct sunlight and extreme temperatures. The spare AAI will only be administered to pupils at risk of anaphylaxis and where written parental consent has been gained. Where a pupil's prescribed AAI cannot be administered correctly and without delay, the spare will be used. Where a pupil who does not have a prescribed AAI appears to be having a severe allergic reaction, the emergency services will be contacted and advice sought as to whether administration of the spare AAI is appropriate. Where a pupil is, or appears to be, having a severe allergic reaction, the emergency services will be contacted even if an AAI device has already been administered.

In the event that an AAI is used, the pupil's parents will be notified that an AAI has been administered and informed whether this was the pupil's or the school's device. Where any AAIs are used, the following information will be recorded on the Adrenaline Auto-Injector (AAI) Record:

- Where and when the reaction took place
- How much medication was given and by whom

For children under the age of 6, a dose of 150 micrograms of adrenaline will be used.

For children aged 6-12 years, a dose of 300 micrograms of adrenaline will be used.

AAIs will not be reused and will be disposed of according to manufacturer's guidelines following use.

In the event of a school trip, pupils at risk of anaphylaxis will have their own AAI with them and the school will consider taking the spare AAI in case of an emergency.

Record keeping

Written records will be kept of all medicines administered to pupils. Proper record keeping will protect both staff and pupils, and provide evidence that agreed procedures have been followed.

Emergency procedures

To request an ambulance – dial 999, ask for an ambulance and be ready with the information below. Speak clearly and slowly, and be ready to repeat information if asked.

- The telephone number: **01242 523786**
- Your name.
- Your location as follows: **St John’s CE Primary School, Albion Street (opposite Kwik Fit)**
- The postcode: **GL52 2SN**
- The exact location of the individual within the school.
- The name of the individual and a brief description of their symptoms.
- The best entrance to use and where the crew will be met and taken to the individual.

Where an IHP is in place, it should detail:

- What constitutes an emergency.
- What to do in an emergency.

Pupils will be informed in general terms of what to do in an emergency, e.g. telling a teacher. If a pupil needs to be taken to hospital, a member of staff will remain with the pupil until their parents arrive.

Day trips, residential visits and sporting activities

Pupils with medical conditions will be supported to participate in school trips, sporting activities and residential visits. Prior to an activity taking place, the school will conduct a risk assessment to identify what reasonable adjustments should be taken to enable pupils with medical conditions to participate. In addition to a risk assessment, advice will be sought from pupils, parents and relevant medical professionals. The school will arrange for adjustments to be made for all pupils to participate, except where evidence from a clinician, e.g. a GP, indicates that this is not possible.

Unacceptable practice

The school will not:

- Assume that pupils with the same condition require the same treatment.
- Prevent pupils from easily accessing their inhalers and medication.
- Ignore the views of the pupil or their parents.
- Ignore medical evidence or opinion.
- Send pupils home frequently for reasons associated with their medical condition, or prevent them from taking part in activities at school, including lunch times, unless specific to their IHP.
- Send an unwell pupil to the school office alone or with an unsuitable escort.
- Penalise pupils with medical conditions for their attendance record, where the absences relate to their condition.
- Make parents feel obliged or forced to visit the school to administer medication or provide medical support, including for toilet issues. The school will ensure that no parent is made to feel that they have to give up working because the school is unable to support their child’s needs.
- Create barriers to pupils participating in school life, including school trips.
- Refuse to allow pupils to eat, drink or use the toilet when they need to in order to manage their condition.

Liability and indemnity

The governing board will ensure that appropriate insurance is in place to cover staff providing support to pupils with medical conditions. The school holds an insurance policy covering liability relating to the administration of medication. All staff providing such support will be provided with access to the insurance policies. In the event of a claim alleging negligence by a member of staff, civil actions are most likely to be brought against the school, not the individual.

Complaints

Parents or pupils wishing to make a complaint concerning the support provided to pupils with medical conditions are required to speak to the school in the first instance. If they are not satisfied with the school's response, they may make a formal complaint via the school's complaints procedures, as outlined in the Complaints Procedures Policy. If the issue remains unresolved, the complainant has the right to make a formal complaint to the DfE. Parents and pupils are free to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

Home-to-school transport

Arranging home-to-school transport for pupils with medical conditions is the responsibility of the LA. Where appropriate, the school will share relevant information to allow the LA to develop appropriate transport plans for pupils with life-threatening conditions.

Defibrillators

The school has an automated external defibrillator (AED). The AED is stored in the foyer of the school front entrance. All staff members and pupils will be made aware of the AED's location and what to do in an emergency. A risk assessment regarding the storage and use of AEDs at the school will be carried out and reviewed annually. No training will be needed to use the AED, as voice and/or visual prompts guide the rescuer through the entire process from when the device is first switched on or opened; however, staff members will be trained in cardiopulmonary resuscitation (CPR), as this is an essential part of first-aid and AED use. Where possible, AEDs will be used in paediatric mode or with paediatric pads for pupils under the age of eight. The emergency services will always be called where an AED is used or requires using.

Monitoring and review

This policy is reviewed on an annual basis by the governing board, school nurse and headteacher. Any changes to this policy will be communicated to all staff, parents and relevant stakeholders.
