

Victorian Cheltenham – Homework Project

Exploring Local History in the Victorian Era

The Victorian era (1837–1901) was a time of great change across Britain — new inventions, expanding railways, social reform, and the growth of towns. Cheltenham, already famous for its spa waters, became a thriving Regency and Victorian town, attracting wealthy visitors and developing beautiful buildings, parks, and schools. Your task is to create a project that explores both Victorian Britain and how Cheltenham changed during this period.

Create a project that focuses on how Cheltenham was influenced by the Victorians

This could be looking at the history of a local street, the history of our school, the workhouse in Cheltenham or the impact of the railway on Cheltenham - to mention but a few!
