

## Calculation Policy 2022

This calculation guidance has been written in line with the programmes of study taken from the revised National Curriculum for Mathematics (2014). It provides guidance on appropriate calculation methods and progression. The content is set out in yearly blocks under the following headings: addition, subtraction, multiplication and division. This guidance aims to develop, model and explain core understandings and mathematical principles and progression to ensure consistency in the teaching and learning of mathematics in our school.

This policy supports the White Rose maths scheme used throughout the school. Progression within each area of calculation is in line with the programme of study in the 2014 National Curriculum. This calculation policy should be used to support children to develop a deep understanding of number and calculation. This policy has been designed to teach children through the use of concrete, pictorial and abstract representations.

- Concrete representation a pupil is first introduced to an idea or skill by acting it out with real objects. This is a 'hands on' component using real objects and is a foundation for conceptual understanding.
- Pictorial representation a pupil has sufficiently understood the 'hands on' experiences performed and can now relate them to representations, such as a diagram or picture of the problem.
- Abstract representation—a pupil is now capable of representing problems by using mathematical notation, for example 12 x 2 = 24. It is important that conceptual understanding, supported by the use of representation, is secure for all procedures.

Reinforcement is achieved by going back and forth between these representations.

Mathematics Mastery - At the centre of the mastery approach to the teaching of mathematics is the belief that all children have the potential to succeed. They should have access to the same curriculum content and deepen their conceptual understanding by tackling differentiated, challenging and varied problems. Similarly, with calculation strategies, children must not simply rote learn procedures, but demonstrate their understanding of these procedures, through the use of Concrete Pictorial Abstract CPA as appropriate, and in reasoning and problem solving activities

This policy outlines the different calculation methods which should be used as outcomes in the EYFS curriculum and the national curriculum in Y1 to Y6. To ensure consistency throughout school this policy outlines the following Whole School and Year Group expectations:

- •A consistent approach to teaching and learning
- •Agreed calculation strategies
- •Non-negotiable methods for written and mental calculations
- Precise mathematical vocabulary to be used (see additional guidelines)
- •Consistent approach to setting out calculations
- •Clear outcomes for every year group and key stage.

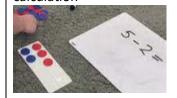

EYFS					
	Developing a strong grounding in number is essential so that all children develop the necessary building blocks to excel mathematically. Children should be able to count				
		between them and the patterns within those			
Addition	Subtraction	Multiplication	Division		
Children are encouraged to gain a sense of the number system through the use of counting concrete objects.	Children are encouraged to gain a sense of the number system through the use of counting concrete objects.	Children use concrete objects to make and count equal groups of objects.	Children use concrete objects to count and share equally into 2 groups		
They combine objects in practical ways and count all.	They understand subtraction as counting out.	They will count on in twos using a bead string and number line.	They count a set of objects and halve them by making two equal groups.

They begin to use + and = They are encouraged to develop a mental picture of the number system in their heads to use for calculations. Higher attaining children may be able to represent their calculations using symbols and numbers within a written calculation

They use concrete and pictorial representation to record their calculations. They begin to use - and = Higher attaining children may be able to represent their calculations using symbols and numbers within a written calculation

representation to record their calculations.

They use concrete and pictorial

They use concrete and pictorial representation to record their calculations.

	Year 1 Addition			
Objective & Strategy	Concrete	Pictorial	Abstract	
Combining two parts to make a whole: part whole model	Use cubes to add two numbers together as a group or in a bar.	Use pictures to add two numbers together as a group or in a bar.	4 + 3 = 7 Use the part-part 10= 6 + 4 whole diagram as shown above to move into the abstract.	
Starting at the bigger number and counting on	Start with the larger number on the bead string and then count on to the smaller number 1 by 1 to find the answer.	12 + 5 = 17 10 11 12 13 14 15 16 17 18 19 20 Start at the larger number on the number line and count on in ones or in one jump to find the answer.	5 + 12 = 17 Place the larger number in your head and count on the smaller number to find your answer.	
Regrouping to make 10. This is an essential skill for column addition later	6 + 5 = 11 Start with the bigger number and use the smaller number to make 10. Use ten frames.	3 + 9 = Use pictures or a number line. Regroup or partition the smaller number using the part part whole model to make 10. $9 + 5 = 14$	7 + 4= 11 If I am at seven, how many more do I need to make 10. How many more do I add on now?	
Represent & use number bonds and related subtraction facts within 20	2 more than 5.	$\begin{array}{c} \hline \\ \hline $	Emphasis should be on the language '1 more than 5 is equal to 6.' '2 more than 5 is 7.' '8 is 3 more than 5.'	

	Year 2	2 Addition	
<b>Objective &amp; Strategy</b>	Concrete	Pictorial	Abstract
Adding multiples of ten	50= 30 = 20		20 + 30 = 50 70 = 50 + 20
	Model using dienes and bead strings	3 tens + 5 tens = tens 30 + 50 = Use representations for base ten.	40 + □ = 60
Use known number facts Part-part whole	20 Children ex- plore ways of making num- bers within 20	20 + = 20 20 - = =	+ 1 = 16 $16 - 1 =  1 +   = 16 16 -   = 1$
Using known facts		$ \begin{array}{c} + \\ \end{array} = 20  20 - \\ = \\ \end{array} \\ + \\ + \\ + \\ \end{array} \\ + \\ \end{array} \\ = \\ \end{array} $	3 + 4 = 7 leads to 30 + 40 = 70 leads to
Bar model		Children draw representations of H,T and O	300 + 400 = 700
	3 + 4 = 7	7 + 3 = 10	23 + 25 = 48

Year 2 Addition			
Objective & Strategy	Concrete	Pictorial	Abstract
Add a two-digit number and ones	17 + 5 = 22      Use ten frame to make 'magic ten      Children explore the pattern.      17 + 5 = 22      27 + 5 = 32	17 + 5 = 22 Use part part whole and number line to model. 17 + 5 = 22 $3$ $2$ $16 + 7$ $16 + 7$ $16 + 7$ $16 + 20$ $16 + 7$	17 + 5 = 22         Explore related facts $17 + 5 = 22$ $5 + 17 = 22$ $22 - 17 = 5$ $22 - 5 = 17$
Add a 2 digit number and tens	25 + 10 = 35 Explore that the ones digit does not change	27 + 30 +10 +10 +10 	27 + 10 = 37 27 + 20 = 47 $27 + \Box = 57$
Add two 2-digit numbers	Model using dienes , place value counters and numicon	+20 +5 Or +20 +3 +2 47 $67$ $72$ $47$ $67$ $70$ $72Use number line and bridge ten using partwhole if necessary.$	25 + 47 $20 + 5$ $40 + 7$ $20 + 40 = 60$ $5 + 7 = 12$ $60 + 12 = 72$
Add three 1-digit numbers	Combine to make 10 first if possible, or bridge 10 then add third digit	Regroup and draw representation. + + + + + + + + + + + + + + + + + + +	4 + 7 + 6 = 10 + 7 $= 17$ Combine the two numbers that make/bridge ten then add on the third.

	Yea	ar 3 Addition	
<b>Objective &amp; Strategy</b>	Concrete	Pictorial	Abstract
Column Addition—no regrouping (friendly numbers) Add two or three 2 or 3- digit numbers.	T O Dienes or numicon	Children move to drawing the counters using a tens and one frame.	223 +114
	Add together the ones first, then the tens. Units 45 34 7 9 Catculations 21+42 = +21 42	tens ones	Add the ones first, then the tens, then the hundreds.
Column Addition with regrouping	Wove to using place value counters         39         15         5         4	Children can draw a representation of the grid to further support their understanding, carrying the ten <u>underneath</u> the line	$20 + 5$ $40 + 8$ $60 + 13 = 73$ Start by partitioning the numbers before formal column to show the exchange. $\frac{+ 85}{621}$ $11$

Year	4-6 Addition	
Concrete	Pictorial	Abstract
Children continue to use dienes or pv counters to add, exchanging ten ones for a ten and ten tens for a hundred and ten	•• 👬 😯 👬	Continue from previous work to carry hundreds as well as tens. Relate to money and measures.
	•• •• •	
	7 1 5 1	
<ul> <li>IIII</li> <li>IIII</li> </ul>	Draw representations using pv grid.

As year 4       Image: Children continue to use dienes for addition.         Introduce decimal place value counters and model exchange for addition.       Image: Children continue to use for addition.

Year 1 Subtraction			
Objective & Strategy	Concrete	Pictorial	Abstract
Taking away ones	Use physical objects, counters, cubes etc to show how objects can be taken away.		7—4 = 3
	6−4 = 2 4−2 = 2		16—9 = 7
Counting back	Move objects away from the group, counting backwards. Move the beads along the bead string as you count backwards.	Count back in ones using a number line	Put 13 in your head, count back 4. What number are you at?
Find the difference	Compare objects and amounts 7 'Seven is 3 more than four' 4 'I am 2 years older than my sister' S Pencils S Pencils 2 Lay objects to represent bar model	Count on using a number line to find the difference. $*^{6}$ $\xrightarrow{*^{6}}$ $\xrightarrow{*^{7}}$ $$	Hannah has 12 sweets and her sister has 5. How many more does Hannah have than her sister.?

Year 1 Subtraction			
<b>Objective &amp; Strategy</b>	Concrete	Pictorial	Abstract
Represent and use number bonds and related subtraction facts within 20 Part-Part Whole model	Link to addition. Use PPW model to model the inverse. If 10 is the whole and 6 is one of the arts, what is the other part? 10-6 = 4	Use pictorial representations to show the part	Move to using numbers within the part whole model.
Make 10	14—9 Make 14 on the ten frame. Take 4 away to make ten, then take one more away so that you have taken 5	13-7 13-7=6 Jump back 3 first, then another 4. Use ten as the stopping point.	<b>16—8</b> How many do we take off first to get to 10? How many left to take off?
Bar Model	5-2=3		$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$

Year 2 Subtraction			
Objective & Strategy	Concrete	Pictorial	Abstract
Regroup a ten into ten ones			20—4 = 16
	Use a PV chart to show how to change a ten into ten ones, use the term 'take and make'		
Partitioning to subtract without regrouping. 'Friendly numbers'	34-13 = 21 Use Dienes to show how to partition the number when subtracting without regrouping.	Children draw representations of Dienes and cross off. $ \begin{array}{c}                                     $	43—21 = 22
Make ten strategy Progression should be crossing one ten, crossing more than one ten, crossing the hundreds.	34-28 Use a bead bar or bead strings to model counting to next ten and the rest	44       +10       +3         76       80       90       93         'counting on' to find 'difference'       90       93         Use a number line to count on to next ten and then the rest.	93—76 = 17

Year 3 Subtraction			
Objective & Strategy	Concrete	Pictorial	Abstract
Column subtraction without regrouping (friendly numbers)	47—32 Use base 10 or Numicon to model	Calculations 5/2 3/2 Draw representations to support understanding	$47-24=23$ $-\frac{40+74}{20+3}$ Intermediate step may be needed to lead to clear subtraction understanding. $32$ $-12$ $20$
Column subtraction with regrouping	Tens Units	45 -29 Tens lones 16 APOR 200 200 200 200 200 200 200 200 200 200	836-254=582 <u>500 50 4</u> <u>500 80 2</u> Begin by partitioning into pv columns
	Begin with base 10 or Numicon. Move to pv counters, modelling the exchange of a ten into ten ones. Use the phrase 'take and make' for exchange	Children may draw base ten or PV counters and cross off.	728-582=146       Then move to $4728$ $728$ $582$ $728$ $146$ $728$ <

	Year 4-6 Subtraction			
Objective & Strategy	Concrete	Pictorial	Abstract	
Subtracting tens and ones Year 4 subtract with up to 4 digits. Introduce decimal subtraction through context of money	234 - 179	Children to draw pv counters and show their exchange—see Y3	2 x 5 4 - 1 5 6 2 1 1 9 2 Use the phrase 'take and make' for ex- change	
Year 5- Subtract with at least 4 digits, including money and measures. Subtract with decimal values, including mixtures of integers and decimals and aligning the decimal	As Year 4	Children to draw pv counters and show their exchange- see Y3		
Year 6—Subtract with increasingly large and more complex numbers and decimal values.			$\begin{array}{c} & & & & & & \\ & & & & \\ & & & & & \\ & & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & &$	

	Year 1 Multiplication			
Objective & Strategy	Concrete	Pictorial	Abstract	
Doubling	Use practical activities using manipultives including cubes and Numicon to demonstrate doubling	Draw pictures to show how to double numbers	Partition a number and then double each part before recombining it back together.	
	$\begin{array}{c} + & \bigcirc & = & \bigcirc \\ + & \bigcirc & \bigcirc \\ + & \bigcirc & = & \bigcirc \\ + & \bigcirc & \bigcirc \\ + & \bigcirc & = & \bigcirc \\ + & \bigcirc & \bigcirc \\$	Double 4 is 8	$ \begin{array}{c} 16 \\ 10 \\ 1 \\ x^2 \\ 20 \\ + 12 \\ = 32 \end{array} $	
Counting in multiples	Count the groups as children are skip counting, children may use their fingers as they are skip counting.	Children make representations to show counting in multiples. $\frac{2}{10} \frac{2}{2} \frac{2}{4} \frac{2}{5} \frac{2}{10} \frac{2}{12} \frac{2}{14} \frac{2}{15} \frac{2}{15} \frac{2}{20}$	Count in multiples of a number aloud. Write sequences with multiples of numbers. 2, 4, 6, 8, 10 5, 10, 15, 20, 25 , 30	
Making equal groups and counting the total	Use manipulatives to create equal groups.	Draw to show 2 x 3 = 6 Draw and make representations	2 x 4 = 8	

Year 1 Multiplication				
Objective & Strategy	Concrete	Pictorial	Abstract	
Repeated addition	Use different objects to add equal groups	Use pictorial including number lines to solve problems There are 3 sweets in one bag. How many sweets are in 5 bags altogether? 3+3+3+3+3 15 3+3+3+3+3 15	Write addition sentences to describe objects and pictures.	
Understanding arrays	Use objects laid out in arrays to find the answers to 2 lots 5, 3 lots of 2 etc	Draw representations of arrays to show understanding	3 x 2 = 6 2 x 5 = 10	

	Year 2 Multiplication				
Objective & Strategy	Concrete	Pictorial	Abstract		
Doubling	Model doubling using dienes and PV counters. 1000000000000000000000000000000000000	Draw pictures and representations to show how to double numbers	Partition a number and then double each part before recombining it back together 16 10 10 10 10 10 10 10 10		
Counting in multiples of 2, 3, 4, 5, 10 from 0 (repeated addition)	Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models. 5+5+5+5+5+5+5=40	Number lines, counting sticks and bar models should be used to show representation of counting in multiples.	Count in multiples of a number aloud. Write sequences with multiples of numbers. 0, 2, 4, 6, 8, 10 0, 3, 6, 9, 12, 15 0, 5, 10, 15, 20, 25, 30 $4 \times 3 =$		

	Year 2 M	lultiplication	
<b>Objective &amp; Strategy</b>	Concrete	Pictorial	Abstract
Multiplication is commutative	Create arrays using counters and cubes and Numicon.	Use representations of arrays to show different calculations and explore commutativity.	$12 = 3 \times 4$ $12 = 4 \times 3$
	With the second seco		Use an array to write multiplication sentences and reinforce repeated addition. 000000000000000000000000000000000000
Using the Inverse This should be taught alongside division, so pupils learn how they work alongside each other.		$\begin{vmatrix} 4 & 2 \\ \hline & \times & = \\ \hline & \times & = \\ \hline & \times & = \\ \hline & \div & = \\ \end{vmatrix}$	2 x 4 = 8 4 x 2 = 8 8 $\div$ 2 = 4 8 $\div$ 4 = 8 8 = 2 x 4 8 = 4 x 2 2 = 8 $\div$ 4 4 = 8 $\div$ 2 Show all 8 related fact family sentences

Objective & Strategy	Concrete	Pictorial	Abstract
Grid method recap from year 3 for 2 digits x 1 digit Move to multiplying 3 digit numbers by 1 digit. (year 4 expectation)	Use place value counters to show how we are finding groups of a number. We are multiplying by 4 so we need 4 rows	Children can represent their work with place value counters in a way that they understand. They can draw the counters using colours to show different amounts	Start with multiplying by one-digit numbers and showing the clear addition alongside the grid.
	Calculations 4 x 126	or just use the circles in the different	× 30 5
		columns to show their thinking as shown below.	7 210 35
	Fill each row with 126		210 + 35 = 245
	Add up each column starting with the ones making any exchanges needed		
Column multiplication	Children can continue to be supported by place value counters at the stage of	× 300 20 7	327
	multiplication. This initially done where	4 1200 80 28 The grid method	x 4
	there is no regrouping 321 x 2 = 642	may be used to show how this relates to a	28
		formal written method.	80
		51 51 51 51 51 51 51 51 51 51 51 7 8 - 59	1200
		= 8 × 60 - 8 8 × 6 = 48	1308
		$8 \times 60 = 4.80$ 4.80 - 8 = (4.72)	This may lead
	Always multiply the ones first	Bar modelling and number lines can support learners when solving problems	to a compact method.
	The corresponding long multiplication is	with multiplication alongside the formal	include.
	modelled alongside	written methods.	

	Year 5/6 I	<b>Multiplication</b>	
Objective & Strategy	Concrete	Pictorial	Abstract
Column Multiplication for 3 and 4 digits x 1 digit.	It is important at this stage that they always multiply the ones first. Hundreds Tens One	x 300 20 7 4 1200 80 28	327 $x 4$ $28$ $80$ $1200$ $1308$ This will lead to a compact method.
Column multiplication	Manipulatives may still be used with the corresponding long multiplication modelled alongside.	10       8         10       100       60         3       30       24         Continue to use bar modelling to support problem solving	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

	Year 6 M	ultiplication	
Objective & Strategy	Concrete	Pictorial	Abstract
Multiplying decimals up to 2 decimal places by a single digit.			Remind children that the single digit belongs in the units column. Line up the decimal points in the question and the answer.
			3 · 1 9
			× 8
			25.52
			When appropriate, children can use their place value knowledge to make the number being multiplied 10, 100 or 1000 times bigger and then multiply and make the answer 10, 100 or 1000 times smaller.
			$\frac{319^{(x100)}}{2552^{(+100)}} = 25.52$

Year 1 Division				
Objective & Strategy	Concrete	Pictorial	Abstract	
Division as sharing Use Gordon ITPs for modelling		Children use pictures or shapes to share quantities.	12 shared between 3 is 4	
		8 shared between 2 is 4		
	10,	Sharing: 4 12 shared between 3 is 4		

	Year 2 Division				
Objective & Strategy	Concrete	Pictorial	Abstract		
Division as sharing	Image: Non-Additional system of the syste	Children use pictures or shapes to share quantities $ \begin{array}{c}  & & & & & \\  & & & & & \\  & & & & & \\  & & & &$	12 ÷ 3 = 4		
Division as grouping	Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding.	Use number lines for grouping	28 ÷ 7 = 4 Divide 28 into 7 groups. How many are in each group?		

	Year	3 Division		
<b>Objective &amp; Strategy</b>	Concrete	Pictorial	Abstract	
Division as grouping	Use cubes, counters, objects or place value counters to aid understanding.	Continue to use bar modelling to aid solving division problems.	How many groups of 6 in 24?	
	24 divided into groups of $6 = 4$ 96 ÷ 3 = 32 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0	20 ? 20 ÷ 5 = ? 5 x ? = 20	24 ÷ 6 = 4	
Division with arrays	Link division to multiplication by creating an array and thinking about the number sentences that can be created. Eg 15 ÷ 3 = 5 5 x 3 = 15 15 ÷ 5 = 3 3 x 5 = 15	Draw an array and use lines to split the array into groups to make multiplication and division sentences	Find the inverse of multiplication and division sentences by creating eight linking number sentences. 7 x 4 = 28 4 x 7 = 28 28 ÷ 7 = 4 28 ÷ 4 = 7 28 = 7 x 4 28 = 4 x 7 4 = 28 ÷ 7 7 = 28 ÷ 4	

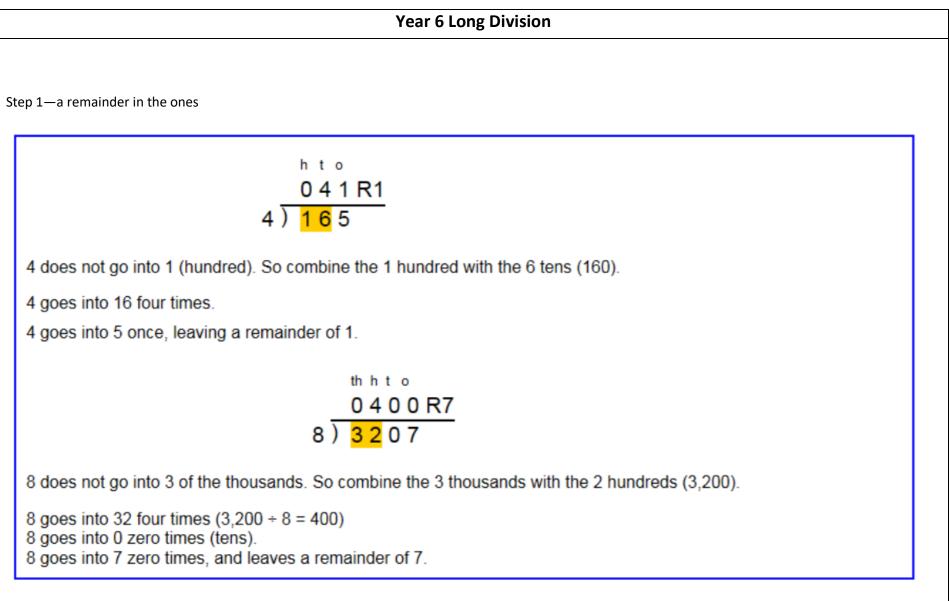

Year 3 Division				
<b>Objective &amp; Strategy</b>	Concrete	Pictorial	Abstract	
Division with remainders	<pre>14 ÷ 3 = Divide objects between groups and see how much is left over</pre>	Jump forward in equal jumps on a number line then see how many more you need to jump to find a remainder	Complete written divisions and show the remainder using r.	
		Image: white iteration is a state of the iteration is a	29 ÷ 8 = 3 REMAINDER 5 ↑ ↑ ↑ ↑ dividend divisor quotient remainder	

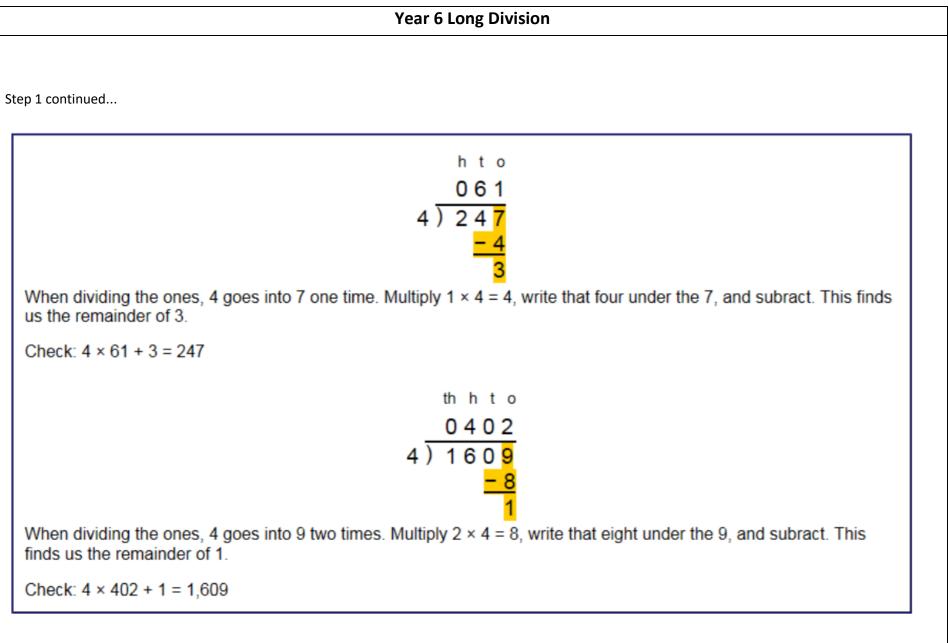

## Year 6 Long Division

Step 2—a remainder in the tens

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
t o 2 2 ) <u>5</u> 8	t o 2 2 ) 5 8 -4 1	$\begin{array}{r} t \circ \\ 29 \\ 2 \overline{)58} \\ \underline{-4} \\ 18 \end{array}$
Two goes into 5 two times, or 5 tens ÷ 2 = 2 whole tens but there is a remainder!	To find it, multiply $2 \times 2 = 4$ , write that 4 under the five, and subtract to find the remainder of 1 ten.	Next, drop down the 8 of the ones next to the leftover 1 ten. You combine the remainder ten with 8 ones, and get 18.

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
t o	t o	t o
29	2 ) 5 8	2)58
-4	<u>- 4</u> 18	$\frac{-4}{18}$
	<u>- 1 8</u>	<u>-18</u>
	<u> </u>	0
Divide 2 into 18. Place 9 into the quotient.	Multiply 9 × 2 = 18, write that 18 under the 18, and subtract.	The division is over since there are no more digits in the dividend. The quotient is 29.

## Year 6 Long Division 2. Multiply & subtract. 3. Drop down the next digit. Step 2—a remainder in any of the place values 1. Divide. hto hto hto 18 1 2)278 2)278 2)2780 Next, drop down the 7 of the tens Multiply 1 × 2 = 2, write that 2 under Two goes into 2 one time, or 2 the two, and subtract to find the next to the zero. hundreds + 2 = 1 hundred. remainder of zero. Divide. Multiply & subtract. Drop down the next digit. hto hto hto 13 13 13 2)278 2)278 2)278 0 Divide 2 into 7. Place 3 into the Multiply 3 × 2 = 6, write that 6 under Next, drop down the 8 of the ones quotient. the 7, and subtract to find the next to the 1 leftover ten. remainder of 1 ten. 1. Divide. 2. Multiply & subtract. 3. Drop down the next digit. hto hto hto 139 139 139 2)278 2)278 2)2786 6 18 -18 n Divide 2 into 18. Place 9 into the Multiply 9 × 2 = 18, write that 18 There are no more digits to drop quotient. under the 18, and subtract to find the down. The quotient is 139. remainder of zero.
